Js  
Python  
C#  
Elm  
Reactjs  
Asp.net core  
Docker  
Nodejs

## PROFILE

An aspiring software developer who began his journey of web-development back in April, 2022. Driven by curiosity and love for the known and the unknown, in today's rapidly changing technological environment Sol Moon doesn't stop learning day by day to be a better developer. He is capable of both front and back-end development.

## Education

Sep 2022 – on going

HBO ICT | Fontys Hogeschool, Eindhoven

- Basics of software engineering.
- Object oriented programming using C#.
- Use of relational database such as SQL to create CRUD System within a C# windows form application.
- Use of MSSQL to analyze and query data from one or multiple data sources to get the desired outcome.

Apr 2022 – Nov 2022

The Odin Project

- An online course for full-stack web-development.
- Includes countless from small to medium size projects to be proficient in the front as well as in the back end.
- The front end includes the use of libraries such as React and API calls.
- The back end includes the use of frameworks such as node.js express, creating CRUD system and connecting to a database to store data in a real environment.

## Work experience

I do not have relevant experience in the field yet.

I'm looking for an Internship so I can finish my studies.
