Docker
Nodejs

PROFILE

An aspiring software developer who began his journey of web-development back in April, 2022. Driven by curiosity and love for the known and the unknown, in today's rapidly changing technological environment Sol Moon doesn't stop learning day by day to be a better developer. He is capable of both front and back-end development.

Education

Sep 2022 – on going
HBO ICT | Fontys Hogeschool, Eindhoven
- Object oriented programming with C#.
- Complete CRUD system with Reactjs, Nodejs, Asp.net core, and SQL.
- Agile philosophy as a way of working in a team environment.
- Creation of scalable applications with suitable software architecture designs such as microservice.
- Functional programming with Elm and basic computer science such as data structures and algorithms.

Apr 2022 – Nov 2022
The Odin Project
- Basics of software engineering.
- Creation of applications made with Html, Css and Javascript.
- Learning of front-end frameworks such as Reactjs.
- Complete a full-stack applications with a back-end framework such as Node Express and Mongodb.

Work experience

I do not have relevant experience in the field yet.
I'm looking for an Internship so I can finish my studies.
Visit my simple web resume to evaluate what I'm capable of by clicking HERE.
